Computer Engineering
Duoc (2018-2021)

ABOUT ME

I'm Camilo Poblete, a computer science graduate with a passion for technology and developing code that positively impacts business development. I have a solid understanding of Big Data, visualization tools, databases, and programming languages, as well as extensive experience in BI (Business Intelligence) using SQL Server 2017.

I stand out for being a dynamic team member, always willing to contribute my skills and knowledge to achieve goals collaboratively in a positive work environment.
Innovative, creative, and open to sharing my ideas to enrich the team.
I'm also interested in learning new technologies to become an expert in the field and contribute added value to the company.

My dedication and commitment to the success of the team and the company guarantee my ability to make a positive difference in any project I'm involved in.
